

Conference Aims

The European Modeling and Simulation Symposium is one of the most important *Simulation Appointment* in Europe. As tradition the conference focuses on Modeling & Simulation in Industry taking into consideration both applications and theoretical approaches.

The conference proposes a multi-sides perspective to Modeling & Simulation environment. Tracks organization is intended to cover different research macro-areas dedicated to Industrial Engineering, Effective Design, Business, Economy and Finance, Medicine, Methodologies, Techniques and Applications. Such framework gives to scientists, technicians and users the opportunity to interact, collaborate on the most challenging research topics in the field of Modeling & Simulation.

Topics

- Modeling & Simulation In Industrial Engineering
- Modelling & Simulation in Medicine
- Effective Design by Modeling & Simulation
- Effective Design by Modeling & Simulation
- Modeling & Simulation Methodologies, Techniques and Applications

21st European Modeling and Simulation Symposium (Simulation in Industry)

Canary Island, Tenerife
September, 2009

Deadlines

- Submission of Papers :
April 12th, 2009
- Notification of Acceptance:
May 20th, 2009
- Final Camera-Ready Submission:
June 10th, 2009
