Call for Paper

The 7th WAMS concentrates on Applications of Simulation and Computer Technologies. The WAMS 2013 was organized in the wonderful framework of Buenos Aires, Argentina and it is a great opportunity for the International Simulation Community to meet together in the wonderful framework of Buenos Aires during its Spring. In fact WAMS is a workshop very effective in networking and very useful to set up new proposals and projects. Worldwide specialists have the opportunity to participate and to interact within this important International Forum on Applied M&S. The audience will include both users, vendors and scientists operating in applying advanced techniques to the main application areas and sectors including Industry, Business, Logistics Environment, Services & Defense.

WAMS started as a series of international workshops organized in Latin America. AMS2004 (Rio de Janeiro) and AMS2006 (Buzios), these events were focusing on Application and Theory of Modeling & Simulation.

In following years WAMS was organized in both side of Atlantic Ocean (i.e. Rio de Janeiro, Italian Riviera), while in 2011, WAMS was co-located with the International Marine Defense Show in St Petersburg Russia organized in Joint Cooperation with SPIRAS Russian Academy of Science.

In 2012, WAMS was held in Rome in connections with the NATO CAX Forum.

Therefore, the WAMS 2013 was back in Latin America and it attracted scientists, technicians and experts from world leading Universities, Institutions, Agencies and Companies.
